

- a) Suppose your group has been hired by the Chief Minister of Bihar to advise him regarding the usage of certain energy resources for Electricity Supply in the state. The energy resources he wants you to explore in today's discussion are Solar Energy, Wind Energy, Nuclear Power and Fuels based on Coals.
- b) In the current scenario, almost 80-85% of the total Electricity supply is done using fuels based on Coal.
- c) Your group has to give a recommendation to the CM regarding which energy resource(s) you should use. If you go for more than one resource, then try to specify the percentage of each.
