

came to conclusion very quickly (too quickly)  
always ask the panel if all should conclude or not  
discuss more pros and cons instead of discussing percentages  
explore through pros-cons discussion  
complete one discussion  
don't start the other in between  
ask others to conclude current bucket and move to the next one  
went towards hydro; not a part of the problem statement  
season wise; vague statement as setting up a solar plant is a fixed investment  
can't be removed season wise
